Network Design for Campus

The project aims to design a network for a new branch of Belgium Campus. The branch has 3 classrooms, each of which has a network point to which the lecturer PC is connected. Each classroom has 10 PC's available that should be able to communicate with the lecturer PC and transfer files. The network has one server which all devices share. A high-speed internet connection is available which is to be shared by the campus PC's and lecturer PC's.

Software Requirements

1. You are required to download Cisco Packet Tracer which will allow you to visually create a network solution and pass data throughout the various nodes. https://www.youtube.com/watch?v=Jlcl7EQFiZI&ab_channel=SolutionsStudio
2. Using Cisco Packet Tracer, develop a network based on the requirements given in 'Network Design for Campus'. How you design your network is up to you. We are looking for the most cost-effective approach. **Cisco Packet Tracer will not be dealt with in class. This will be a complete self-study, research project.**

Mark Allocation:

Criteria	Weight
Introduction	5
Network and Hardware Chosen and Explanation	20
Network Topology Diagrams in Cisco Packet Tracer	20
TCP/IP address Configuration	10
TCP/IP static IP address Allocation	5
DHCP Design and Scope	5
Network Solution Explanation	20

Teamwork Effort and collaboration – Peer Reviews	10
Video Quality (Professional, Each Member Presenting)	5
Total	**100**

Additional Information:

1. This is a group project. No more than 3 group members. This project must be presented
2. All core work covered in this project on shall be based on original ideas. Where other people's work has been used (either from a printed source, Internet, or any other source), this has been properly acknowledged and referenced in accordance with departmental requirements.
3. **Late assignments will not be accepted**; missing the deadline is an automatic 0.
4. **Please ensure that all group members are present when presenting**. If you do not present, this will result in you getting 0 for this project.
